Islamabad, Pakistan

Technical Skills

- React JS
- Socket Programming
- MongoDB
- NEXT JS
- Adobe Illustrator
- Figma Designing

Education

- **FSC Pre Engineering**
Quaid e azam College Mardan 2021 - 2023
Completed my FSC with a good achievement of 90 % Score in Pre Engineering, while studying on merit based scholarship at my college.
- **Bachelor in Software Engineering**
Comsats University Islamabad 2023 - Still Studying
Currently studying bachelors in Software Engineering (4Th semester), while maintaining my side skills and focusing on continuous growth and Development. During my University education, I have educated myself about modern web technologies due to my strong passion for Web Development.

Previous Projects

- **InveNexus**
invenexus.vercel.app/dashboard
This is basically an Inventory Management System, that i have developed using Next JS and Mongo db for storing inventory related information. The project was built entirely for portfolio purpose.
- **Mr. Generous**
<https://mr-generous.vercel.app/>
This is a simulation of an idea, where users can sign up and pay donations to their favorite social working organizations, operating in Pakistan. It was Developed using Next js for portfolio purposes.
- **HireTask**
<https://virtual-job-market-analysis-tool.vercel.app/>
This is a full stack, fully responsive job portal, where employers can post jobs and candidates will apply on those jobs. The Framework used here is Next Js.

Industrial Experience

Currently, I don't have Industrial Experience and looking for an opportunity as an Intern or Junior Developer to showcase my skills and Build my Resume through Real world Projects.
